CLICKER TRAINING: OFF TO A GREAT START!

A Happy, Healthy Family Pet Workshop

Clicker (marker) training may be the single most powerful concept in animal training in decades. But effective clicker training requires the trainer to be “fluent” in a set of skills that are new to many of us.

This class teaches **humans** a set of foundation skills that will get them off to a good, solid start. This is NOT a lecture class. Little time will be spent on the *why* so that you can get down to work on the *how* in a practical, hands-on workshop that will help you develop the necessary mechanical skills of **timing, treat delivery, observation, shaping, and capturing** that are needed to communicate quickly and accurately with animals.

This workshop will have you on your feet having a great time with a set of fast, fun foundation skills! You will work with clicker savvy dogs provided by the instructor. Please leave your own dogs at home.

Teachers: This workshop is an opportunity to have some fun being a student and learning ways to help your learners have better clicker training skills right from the start.

WHEN: Saturday, 4/25/2009
4:00 pm - 6:00 pm

WHERE: Pup-A-Razzi
16300 SW Hart Rd, Suite H
